FRANCISZEK KOSSUT

BACHELOR OF ARTIFICIAL INTELLIGENCE | JUNIOR DEVELOPER & LINUX ADMINISTRATOR

fkossut.inter@gmail.com | kossut.dev | +45 31 89 17 46 | +48 696 234 393 | Gammelhavn 44, 1. 22, Vejle, Denmark | 25/04/2008

PROFILE

Self-taught developer and Linux administrator with 2+ years of hands-on experience running live production systems, building web applications, and solving technical problems independently. **National champion of the Nordic AI Cup 2026** with team "Elysa's Secret", **finishing 1st in Denmark.** Currently studying a **B.Sc. in Artificial Intelligence** at the University of Southern Denmark (SDU Vejle), with strong Excel/SQL data-analysis skills and hands-on experience applying AI and automation tools, including Copilot and Claude, to simplify everyday digital workflows.

ACHIEVEMENTS

Nordic AI Cup 2026 - National Champion, Denmark

Team "Elysa's Secret", University of Southern Denmark - hosted by Ambolt AI, in partnership with DDSA & Pioneer Centre for AI

• Ranked #1 nationally among competing teams from Denmark across three independent AI challenges: real-time object detection (Ultralytics YOLO11), multi-agent simulation (CMA-ES evolutionary optimization), and speech-to-text + LLM data extraction (Whisper, Qwen)

• Placed 1st specifically in the audio/LLM challenge: built a pipeline using faster-whisper for transcription and a 27B open-weight LLM (Qwen, served via vLLM) to extract structured yes/no answers with supporting evidence, voting across an ensemble of independently trained transformer models (DeBERTa) for reliability

• Caught and fixed a data-validation bug that had been silently corrupting the team's model comparisons, redirecting the final decision under a strict single-attempt scoring rule

• Contributed hands-on technical work across all three challenges: independently built the Survival Simulator agent policy from scratch, reaching 1,400+ on validation; drove the key diagnostic fixes behind Drone Flyby's final configuration; and first brought Medical Appointment to a 0.80+ validation score before handing it off for further development

EXPERIENCE

Server & Website Manager - Self-Employed *Sep 2023 - Jul 2025*

Independent project, hosted on OVH Cloud

• Administered a Debian Linux server hosting a live community platform for 50+ concurrent users, maintaining uptime and resolving production issues including permission, configuration failures and other sudden issues

• Designed and built multiple Microsoft Excel spreadsheets to analyze user engagement data and improve communication workflows

• Diagnosed and fixed server bugs, including root-cause permission errors and service misconfigurations, with no formal support team

• Ran full technical operations: server security, updates, backups, and cross-version migrations, alongside marketing and content creation to grow the user base

3D Character Artist - Self-Employed *Sep 2025 - Sep 2026*

Fsski Creations

• Model and texture stylized 3D characters in Blender, optimized separately for resin and FDM filament printing

• Handle the full production pipeline: rigging, shading, texture painting, rendering, and product-style advertisement visuals

• Manage projects promotion on Kickstarter and community platforms, from concept to launch

Kitchen Assistant *Jul 2025 - Sep 2025 (125 hrs)*

Nabutok Sushi

• Worked effectively under time pressure in a fast-paced kitchen, communicating in English throughout

Salesperson *Apr 2023 - Jan 2024*

Private Polish Company

• Handled direct customer service and price negotiation

EDUCATION

Bachelor of Artificial Intelligence *Sep 2026 (ongoing)*

University of Southern Denmark (SDU)

High School with Bilingual Classes (named after Adam Mickiewicz) *Piastów, Poland*

Advanced track: Mathematics, Computer Science, and English

PROJECTS

Nordic AI Cup 2026 - Codebase

Python, Ultralytics YOLO11, faster-whisper, Qwen (vLLM), CMA-ES
GitHub: *github.com/emermelada/nordic-ai-cup*

• Public repository for all three winning challenge solutions (Drone Flyby, Medical Appointment, Survival Simulator).
see Achievements above for results

Algorithmic Methods & Data Analysis

Python 3.14, Microsoft Excel, Access, Office 365

• Solved 75+ algorithmic problems in Python: recursion, number theory, string/array processing, classical ciphers, binary systems, quicksort and bubble sort

• Used AI coding assistants (claude, gemini) alongside independent study to accelerate learning and sharpen problem-solving

• Built Excel workbooks for data center, demography and spa datasets: nested IF, SUMIF/COUNTIF, VLOOKUP/INDEX-MATCH, pivot tables and charts for data analysis and simulations

• Designed and queried multi-table Access databases (perfumery, beauty salon and offence register), using SQL/QBE joins, GROUP BY aggregates (COUNT, SUM, AVG), date functions and sorted TOP-N queries

• Implemented core algorithms from scratch. Such as: Euclidean GCD, primality testing and prime factorization, binary-decimal conversion, Pascal's triangle, and columnar transposition ciphers, without relying on built-in features

MealPlanner App

React Native, TypeScript, Expo, SQLite, Claude Code

• Built a 10-screen mobile app from scratch: recipe browsing with filters, fridge-based shopping list generation, calorie tracking, and voice-controlled recipe search

• Managed the project independently end-to-end, iteratively shipping new features based on real daily use

SKILLS

• AI Tools & Automation - Claude Code, Copilot, applied LLM and computer-vision pipelines (Nordic AI Cup 2026); Excel/Access automation and workflow scripting

• Linux Server Administration (Debian, Putty) - maintenance and administrative tasks, permissions / security, troubleshooting

• Web management and optimization - using Caddy and Hiawatha

• Python scripting, algorithms and automation

• Proficient in Microsoft Office - Extensive Excel data handling, SQL analytics and simulations based on given data

• 3D Modeling & Printing - Blender, resin and filament optimization

LANGUAGES

Polish: Native **English:** C1 (IELTS certified) **Spanish:** Basic

ADDITIONAL

• Sabre fencer, 2016–2025 — 8 years of competitive efforts, and a lot of international tournament experience

• Hobby; Card games requiring analytical thinking, social gatherings, product development

I hereby give consent for my personal data included in this application to be processed for the purposes of the recruitment process under Regulation (EU) 2016/679 (GDPR).
